SUMMARY

Data Scientist with a background in economics. Over 6 years of experience delivering data products and analytics capabilities at startups, IGOs, and large technology firms. Proven track record analyzing macroeconomic datasets, building machine learning systems, and working cross-functionally. Currently seeking a role in macroeconomic research and analysis.

SKILLS

Programming Languages	Python, R, SQL
Data Science Libraries	pandas, polars, numpy, scikit-learn, tensorflow, faiss
Data and Infrastructure Tools	Airflow, dbt, Jenkins, Looker, Dataiku, AWS, Terraform, Docker, Flask
Databases	Snowflake, Postgres, BigQuery, MySQL, Athena

EXPERIENCE

Associate Bank for International Settlements	Oct 2024 - August 2025 <i>Basel, Switzerland</i>
--	---

- Built causal inference models using R to research the relationship between economic uncertainty and tourism.
- Identified and built signals from alternative data for nowcasting key macroeconomic variables and which were highly correlated with and more timely than official statistics.
- Created and presented data monitoring prototype to high-level monetary policy decision-makers in Switzerland.

Analytics Engineer Consultant Mon Ami	Mar 2024 - August 2024 <i>Remote</i>
---	---

- Developed and refactored dozens of critical client-facing data models using dbt, BigQuery, and Looker.
- Mentored junior team members, teaching engineering concepts, technical skills, and problem-solving.

Data Engineer NYSHEX	Dec 2022 - Sept 2023 <i>New York, NY</i>
--------------------------------	---

- Developed end-to-end data pipelines handling 100k daily API calls using Python, AWS, and Terraform.
- Created Python scripts to automate three daily operational tasks, reducing manual effort by 75%.

Data Consultant Qbiz	Mar 2022 - Dec 2022 <i>Remote</i>
--------------------------------	--------------------------------------

- Streamlined reporting by refactoring and eliminating thousands of lines of code and redundant dashboards using SQL, Looker and Airflow, leading to consolidated data sources that increased efficiency for product managers.
- Delivered presentations on tooling to the client and assisted in onboarding teammates with technical mentorship.

Data Scientist Trade Coffee	Mar 2020 - Feb 2022 <i>Remote</i>
---------------------------------------	--------------------------------------

- Developed and deployed an embeddings-based item-to-item recommendation system using Python, tensorflow, faiss and Docker, which integrated into three key website features and handled 3 requests per second.
- Built a user-to-item recommendation system, improving user satisfaction by 3%, using tensorflow and Flask.

Data Analyst M.Gemi	Mar 2017 - Oct 2019 <i>New York, NY</i>
-------------------------------	--

- Owned and managed BI infrastructure using Looker, dbt, and Postgres. Cut key table build time from 2 hours to 15 minutes, enhancing analytics capability.
- Maintained two machine learning systems, including an LSTM marketing model which generated \$25k monthly revenue.

EDUCATION

Economics, Master of Arts - CUNY John Jay College Relevant Coursework: Econometrics I & II	2022 - 2024
--	-------------

Economics, Bachelor of Arts - Boston University Minors in Statistics & Computer Science	2013 - 2017
---	-------------
